

Performance Financed Emissions Reduction

Features:

- Direct Burner Replacement
- No Equipment Capital Expense
- Quick Turnaround
- No Catalyst or Chemicals

Benefits:

- Sub 5ppm NOx
- Reduced Maintenance Costs
- Noise Reduction
- Increased Performance
- Minimal Operating Expenses

Capital free, self funding sub 5ppm NOx burner supply

ClearSign is providing our Texas customers with an alternative funding option to install our leading ClearSign Core™ Process Burner technology without having to spend capital for the burner equipment. Prepare your facility for NOx reduction requirements without the capital expenditure, operational costs or ongoing efficiency reduction associated with installing SCRs.

Call or email us today to find out how we can replace your current technology at little or no cost to you.
