

LOW NOx SOLUTIONS

ClearSign Technologies and Rogue Combustion collaborated to develop Ultra-Low NOx burners to meet the most stringent emission standards.

With sub 2.5ppm, 5ppm, and 9ppm NOx guarantees, we're setting new standards for clean combustion.

NEAR ZERO NOx

FIRETUBE BOILER BURNER

- NOx Level as Low as Sub 2.5 PPM
- CO Sub 50 PPM
- No External FGR Required
- On-Site Install and Tuning
- No Catalyst or Reagents
- Burner Packaged with Controls
- Retrofit and New Equipment

S-SERIES BURNERS

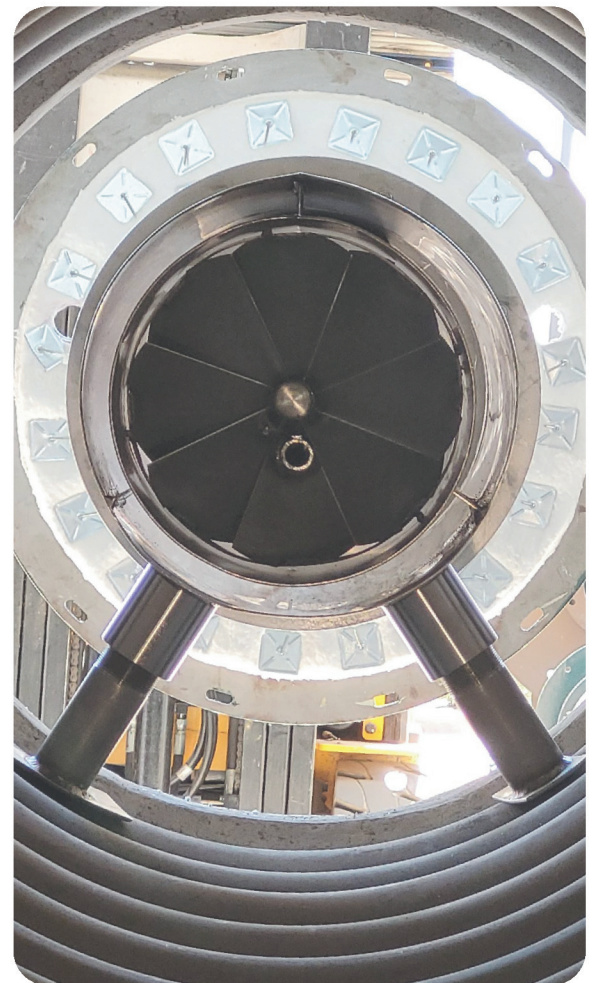

Our engineers have simplified our NZN burner design without compromising performance. The S-series offers optimized fuel utilization and reduced operating costs with 5ppm and 9ppm NOx guarantees. Featuring cutting-edge technology at a competitive price point, your equipment is also future-proofed. Each S-series burner can be easily upgraded to an NZN burner, ensuring compliance with upcoming regulations.
